Jyothy Institute of Technology

Tataguni, off Kanakapura road, Bengaluru-560082

Approved by The All India Council for Technical Education (AICTE) - New Delhi;

Affiliated to Visvesvaraya Technological University (VTU), Belagavi;

ECE, CSE, ISE, CV- Accredited by National Board of Accreditation (NBA) -New Delhi.

DEPARTMENT OF MATHEMATICS

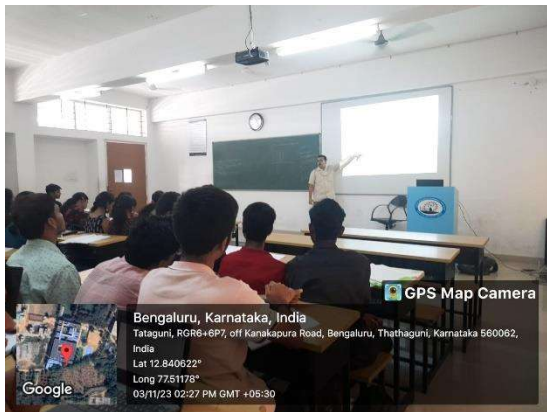

PEER TO PEER LEARNING

The Department of Mathematics organised a “PEER TO PEER” Learning from 26th October 2023 to 04th November 2023 for the First Semester students of the 2023 batch. B S Shreesha student from Department of Information Science and Engineering was chosen and the sessions were taken, which included the Basics of Python Programming and Mathematical approach to Python Programming and how to solve the mathematics problem using Python.

In these sessions a comparison of C/C++ and Python programming was taught with an insight of different kinds of usage of syntax and the language attributes that was changes, basic syntaxes of python that included variables, datatypes (inclusion of lists), conditional statements (if, elif, else and nested conditionals) and looping statements (for, while, nested loops) were taught. After teaching these concepts, and making them revise, the libraries/modules present in python for solving the mathematical concepts were taken that included Numpy, sympy and matplotlib. The basic graphs such as Exponential graph, sine graph, cosine graph, graph tracing questions such as lemniscate, circle, Folium De-Cartes were taught. Different operations onto the graph tracing were taken. Iterations of the graphs, Radius of curvature and angle between 2 curves were first taken by the teachers later an insight was given through Python Programming.

The python programming lessons also involved teaching the students of how the variables and datatypes worked also tracing of each mathematical program how they worked gave the students an idea of how to program in python and implement them in mathematics.

I would like to thank the Department of Mathematics for providing such a great opportunity to teach the lower semester students and also it helped me gain knowledge in the field of python programming using Mathematics.

CLASSES ENGAGED

CLASS NAME	PROFESSOR NAME
A SECTION	Prof. Gurudatt T S
B SECTION	Dr. Madhusudhan R
C SECTION	Prof. Sahana K S
D SECTION	Prof. Latha R
E SECTION	Prof. Sahana K S
F SECTION	Prof. Vishwanath M C
G SECTION	Prof. Gurudatt T S
H SECTION	Dr. Kemparaju M C
